Customer No. 01933

Listing of Claims:

Claims 1-36 (Canceled).

37. (New) A print method comprising:

acquiring a caller's number of a portable communication terminal, when the portable communication terminal accesses a server through a network;

5 determining whether a download request is issued;

causing the portable communication terminal to display thumbnails corresponding to images on the server, when it is determined that a download request has not been issued;

10 determining whether the portable communication terminal has issued a registration command to register at least one of the images on the server corresponding to at least one of the thumbnails displayed by the portable communication terminal; and

15 relating the at least one selected image with the caller's number and storing the selected image in association with the caller's number when it is determined that the portable communication terminal has issued the registration command.

38. (New) A print method comprising:
connecting a portable communication terminal to a server
through a network;
displaying, on the portable communication terminal,
5 thumbnails corresponding to images on the server;
selecting at least one of the thumbnails;
transmitting, from the portable communication terminal to
the server, a registration command for relating the at least one
image corresponding to the at least one selected thumbnail with a
10 caller's number of the portable communication terminal, and
storing the at least one selected image in association with the
related caller's number on the server;
disconnecting the portable communication terminal from the
server;
15 determining whether a print command has been issued at a
printer coupled to the portable communication terminal;
connecting the printer to the server through the portable
communication terminal, when it is determined that the print
command has been issued;
20 transmitting a download request from the printer to the
server; and
receiving at the printer the at least one image stored in
association with the related caller's number, which is
transmitted from the server in response to the download request.

39. (New) A print system comprising:

means for connecting a portable communication terminal to a server through a network;

means for acquiring a caller's number of the portable communication terminal, when the portable communication terminal accesses the server;

means for displaying, on the portable communication terminal, thumbnails corresponding to images on the server;

means for selecting at least one of the thumbnails;

means for relating the at least one selected image with the caller's number and for storing the at least one selected image in association with the caller's number;

means for disconnecting the portable communication terminal from the server;

means for connecting the printer to the server through the portable communication terminal when a print command is issued;

means for transmitting a download request from the printer to the server;

means for receiving the at least one image stored in association with the related caller's number, which is transmitted from the server in response to the download request; and

means for controlling the printer to print the at least one received image.
